Relevant Experience

Software Engineer & Founder @ Young Student LLC

Jan 2019 – Present // Remote – Karaganda, Kazakhstan

eDMS for student service centers at universities | SaaS product

- Turned a hobby project to a profitable company
- Hired a freelance developer to build the mobile version of the app
- Reduced the mean processing time per application from 9 minutes to 30 seconds
- Configured Nginx to serve WebSockets via Action Cable to execute GraphQL subscriptions
- Utilized React for the web and handled its entire state management with Apollo Client
- Set up KendoReact to generate exportable pre-filled application documents and reports
- Added digital signatures for signing the documents by implementing NCALayer
- Introduced smart and conventional commits into the workflow

Stack: Ruby, GraphQL, PostgreSQL, JavaScript, React, Apollo Client, Styled Components, i18n, KendoReact, Auth0, Netlify, AWS (EC2, S3, RDS, Route 53, SNS, SQS, SES, Amplify)

Software Engineer @ Eurasian Tech LLC

Dec 2019 – Jan 2020 // Remote – Moscow, Russia

B2B E-commerce SPA and cross-platform mobile application | Prototype

- Built the server with GraphQL API in Ruby connected to PostgreSQL database
- Utilized React for the web and handled its entire state management with Apollo Client
- Designed and developed the mobile version of the app in React Native (Expo) under 5 days
- Setup parameter range product filtering with PostgreSQL's jsonb data type (NoSQL)
- Integrated Auth0 to handle user authentication through email and social login

Software Engineer @ Silkway Labs

May – Sep 2019 // Karaganda, Kazakhstan – San Diego, CA

Audio feed cross-platform mobile application | MVP

- Translated the design of 40+ screens into functional front-end for both iOS and Android devices
- Implemented recording and playback functionalities for the audio feed by utilizing Expo AV API
- Cooperated with the backend engineer to ensure the smooth operation of the Redux store
- Worked in an agile distributed team with communication handled over Slack, Zoom and Jira

Utilized: JavaScript (ES6+), React Native, Expo, Firebase, CircleCI, Code Review, Scrum

Higher Education

Karaganda Economic University

Jan 2019 – Jun 2021 // Karaganda, Kazakhstan

B.E. in Computer Software Engineering

- Academic Council Scholarship

Pusan National University

Sep 2016 - Jun 2018 // Busan, South Korea

B.S. in Computer Science Engineering (transferred out)

- Excellent International Students Scholarship

Technical Skills

Programming Languages

JavaScript (ES6+), Ruby, C

Frameworks

React, React Native, Ruby on Rails

Database & State Management

SQL, PostgreSQL, Firebase, JSON, REST, GraphQL, Apollo Client, Redux

Web Technologies

HTML, CSS, styled-components, Sockets, OAuth 2.0, JWT

Tools & Platforms

UNIX, Git, Netlify, Heroku, AWS

Languages

English – fluent; Kazakh, Russian – native; Korean – elementary
